

# Questionnaire

## 1 welcome

---

Dear Participant,

Thank you for your interest in the study! The goal of this study is to evaluate a novel non-conventional learning tool for recipe writing.

Please, only continue if you have previous cooking experience. This means that you have cooked at least 3 different dishes with a preparation time greater than 15 minutes.

In the following study, you will first answer some questions (~3 minutes), then, we will ask you to write one procedural text (5 minutes). Next, you will use a writing support tool to write three cooking recipes (~30 minutes, 10 minutes each). Lastly, you will write another procedural text (5 minutes) and answer the final questions (~7 minutes).

The study will take ~50 minutes to complete. Please ensure that you have enough time to finish the study correctly. Unfinished or only partially answered studies will not be considered as taken part.

Make sure you are using a desktop computer (no smartphone or tablet) with a real keyboard.

Your answers and data will be kept confidential and used for research purposes only.

We ask you to approach the questions and exercises with seriousness and to complete them to the best of your ability. We will subsequently check questionnaires for seriousness and will have to discard questionnaires that do not meet this requirement.

Thank you for your help.

If you have any questions or difficulties, please feel free to contact us at: XXX

4 pre-test

Now, we will start with the first procedural writing task. Below you see the visual instructions on how to assemble a table.

Your task is to provide a textual description of the different steps. Your goal is that the reader can assemble the table by following your written

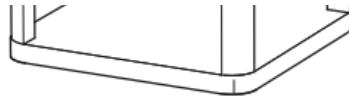

instructions without seeing the images.  
In the space below, write the textual instructions to assemble the piece of furniture. Please take 5 minutes for this task.

## 5 general-text

**In the following, we will start the experiment. You will be asked to write three cooking recipes using a non-conventional learning tool.**

**Please imagine the following scenario:**

***It's a Sunday afternoon and your best friend calls you with a very hectic voice: They need to prepare a dish for their close family/friends/colleagues who are going to visit in the evening. Your friend asks you to give them three different cooking recipes to choose from. Be aware, that your friend has not a lot of cooking experience and, hence, you have to write the recipe as structured and understandable as possible from them.***

---

**In the following pages, you will write three different cooking recipes of dishes you have prepared or watched someone else prepare with a preparation time greater than 15 minutes.**

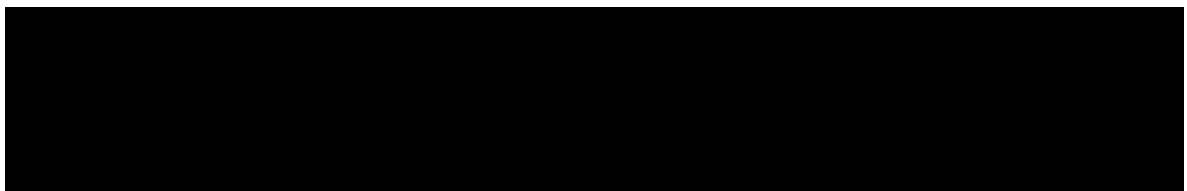

**It is very important that you write the recipes on your own without any external help or inspiration. Please do not look up recipes on the internet or other resources like cooking books. Recipes identified as copied will make the study invalid. Use your imagination if you do not remember something (ingredients, cooking method, tools, steps).**

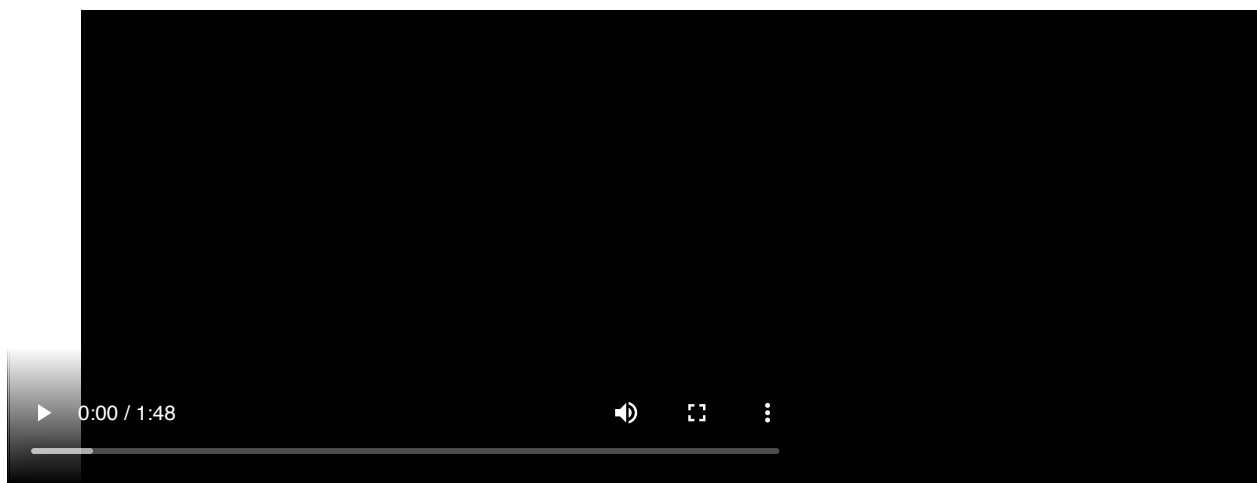

-

**If you have any questions, difficulties, or other concerns with the writing tool, please feel free to contact us at XXX**

**11 task**

---

**Task 1/3: Recipe 1 (the first recipe you recommend to your best friend)**

**Write a cooking recipe for a dish you cooked (or watched someone else cook) that took more than 15 minutes to prepare. Remember that your helping your best friend impress their family/friends/colleagues.**

- .. Open the writing tool here. If the link doesn't work, paste the following link on a new tab: <https://recipe-support-frontend.herokuapp.com/>
- !. Enter your prolific ID and the key from the video page.
- !. Then, write your recipe.
- !. Next, click on "Analyze".
- !. Read the text on the Personal Dashboard

7. Read the text on the Personal Dashboard.
8. Then, edit your recipe accordingly. You may edit and analyze it as many times as you like.
9. When you have finished, click on "Save and Reset".
10. Finally, return to this survey after writing the first recipe.

What did you edit (add/remove or change) from your original text (the recipe you wrote)? Why did you make these editions?

---

## 12 task-2

---

### Task 2/3: Recipe 2 (the second recipe you recommend to your best friend)

**Write a cooking recipe for a dish you cooked (or watched someone else cook) that took more than 15 minutes to prepare. Remember that your helping your best friend impress their family/friends/colleagues.**

**This recipe must be different from the previous one you wrote. If you wrote a recipe for a salty dish, you could write a recipe for a dessert or baking dish.**

1. Open the writing tool here. If the link doesn't work, paste the following link on a new tab: <https://recipe-support-frontend.herokuapp.com/>
2. Enter your prolific ID and the key from the video page.
3. Then, write your recipe.
4. Next, click on "Analyze".
5. Read the text on the Personal Dashboard.
6. Then, edit your recipe accordingly. You may edit and analyze it as many times as you like.
7. When you have finished, click on "Save and Reset".
8. Finally, return to this survey after writing this second recipe.

What did you edit (add/remove or change) from your original text (the recipe you wrote)? Why did you make these editions?

---

## 13 task-3

---

### Task 3/3: Recipe 3 (the third recipe you recommend to your best friend)

**Write a cooking recipe for a dish you cooked (or watched someone else cook) that took more than 15 minutes to prepare. Remember that your helping your best friend impress their family/friends/colleagues.**

**This recipe must be different from the previous two recipes you wrote. If you wrote a recipe for a salty and sweet dish, you could write a recipe for a seasonal dish.**

1. Open the writing tool here. If the link doesn't work, paste the following link on a new tab: <https://recipe-support-frontend.herokuapp.com/>
2. Enter your prolific ID and the key from the video page.
3. Then, write your recipe.
4. Next, click on "Analyze".
5. Read the text on the Personal Dashboard.
6. Then, edit your recipe accordingly. You may edit and analyze it as many times as you like.
7. When you have finished, click on "Save and Reset".
8. Finally, return to this survey after writing this third (and last) recipe.

What did you edit (add/remove or change) from your original text (the recipe you wrote)? Why did you make these editions?

## 14 post-test

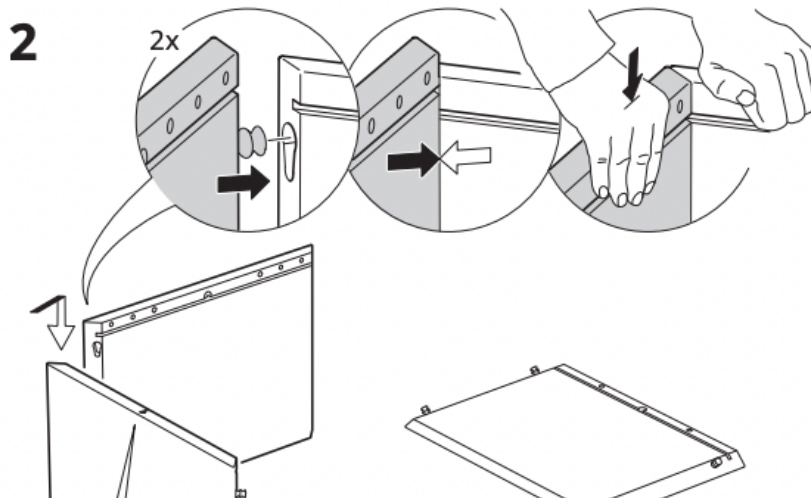

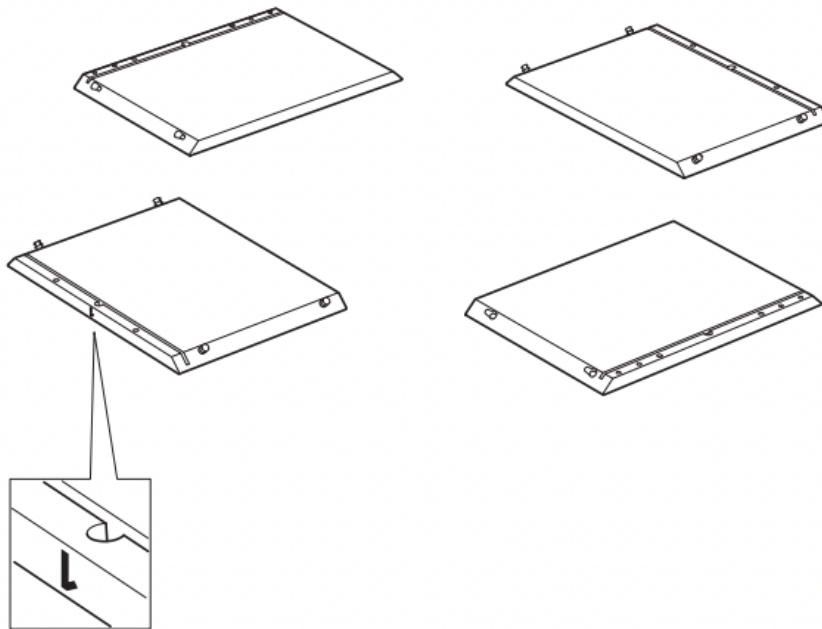

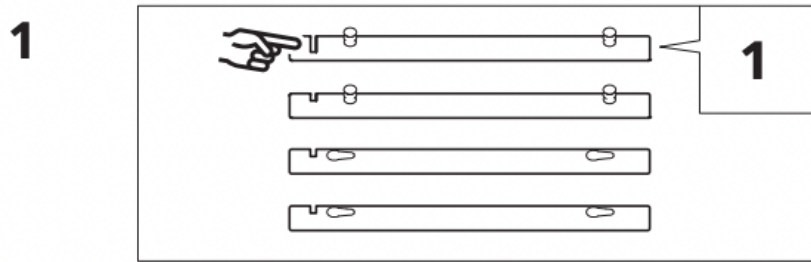

Wow! Your best friend's family/friends or colleagues were delighted! Your best friend followed the second recipe and it was a major success! Congratulations!

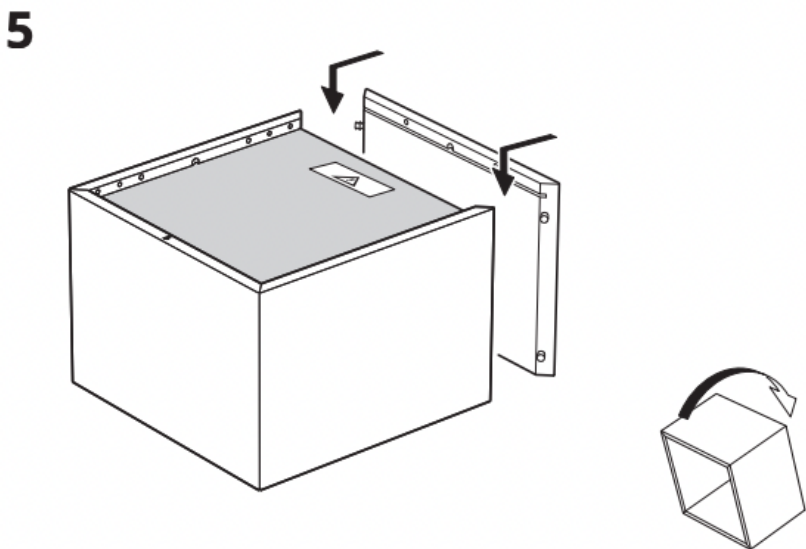

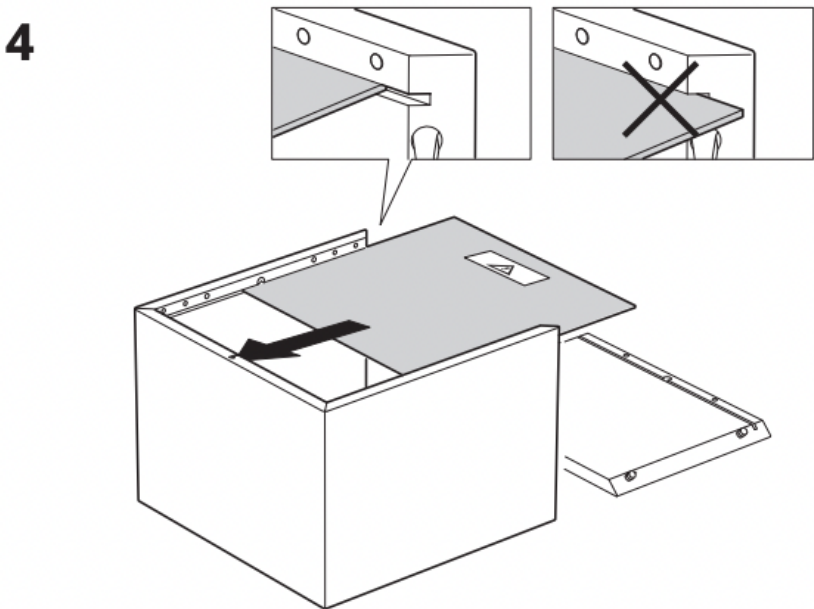

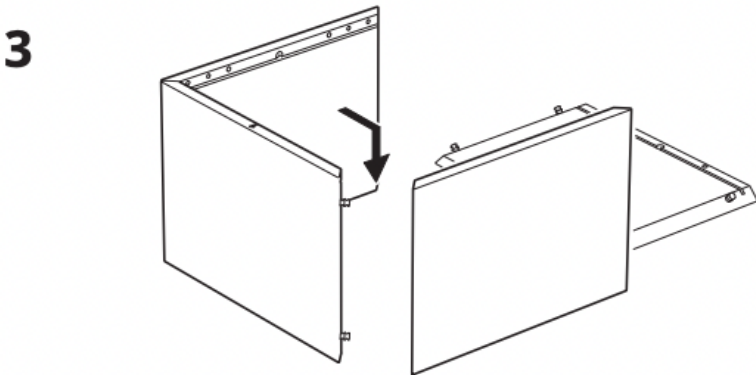

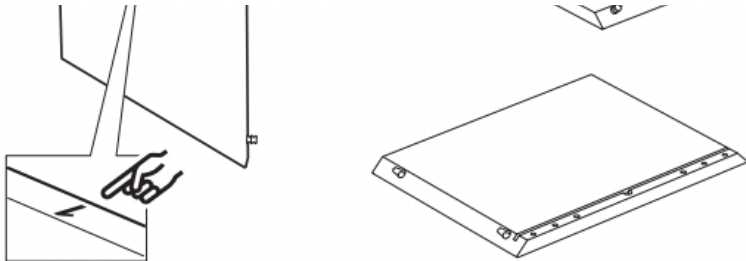

In this last part of the study, we will ask you to write one last procedural writing task. This is similar to the first procedural task of assembling a piece of furniture. Below you see the visual instructions on how to assemble a wooden cube.

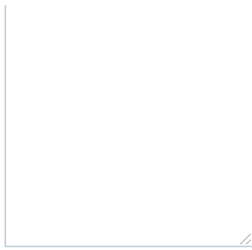

Your task is to provide a textual description of the different steps. Your goal is that the reader can assemble the cube by following your written instructions without seeing the images.

Use what you learned about procedural writing from the recipe exercises.

In the space below, write the textual instructions to assemble the piece of furniture. Please take 5 minutes for this task.

Thank you for your answers so far. In this last section, we will ask you some open questions

How did the example recipes from other users help you improve your recipe?

How did answering the reflective questions in RELEX help you learn and improve your recipe?

How did the highlighted elements in RELEX help you learn and improve your recipe?

What did you like from RELEX?

How would you improve RELEX?
